

PM Advisory Services

Constrained by time, budget, and scope, organizations are more challenged today than ever with keeping mission-critical programs and projects on track to achieve stated measurable goals and objectives. Successful program management requires continuous monitoring and early detection of risks that can result in budget overruns and project delays. ERPi's highly experienced PM Advisory Services professionals have a track record of providing effective PM services for programs and projects of varying sizes and complexity. Our professionals include a mix of former career or appointee SES-level employees, program managers, and consulting professionals who have program management experience in the federal space. Our suite of PM advisory services covers the full spectrum of planning, governance, program measurement and improvement, and integration capabilities.

THE ERPi APPROACH

Our approach incorporates federal project management and capital investment regulatory requirements, processes, principles, and best practices. Whether performing a project risk assessment or augmenting project management offices (PMO), our role is to always serve the best interests of our clients. To maintain an adaptive, iterative management approach, ERPi's professionals foster clear and open communications with stakeholders throughout the project life to remain vigilant of shifts in priorities and needs. Our knowledge leaders are proficient in recognized frameworks and hold certifications such as:

- PMI's PMBOK
- SEI's CMMI
- Project Management Professional
- Lean Six Sigma

Our PM advisors have the experience to help you succeed. We offer a host of services, including:

- PMO Support & Augmentation
- Performance Management
- IV&V and Quality Assurance
- Project Risk Assessment
- Resource Management
- Business Process Improvement

SUCCESS STORIES

- Providing a defense agency with comprehensive program management services supporting deployment of a decision support system that delivers automation allowing six times more client units and installations to be reviewed monthly, with a cost avoidance of \$2.5M/year.
- Supporting a multi-year effort to improve vendor payment, resulting in significant improvements including:
- Reducing prompt payment penalties from over \$3M/year to approximately \$500K/year;
- Reducing the invoice backlog from over 25,000 invoices to less than 1,000; and
- Improving prompt payment performance from less than 70% to 98%.
- Developing planning templates for agency initiatives to support reporting to senior leadership, program execution, and strategic planning.
- Providing strategic and analytic approaches to support project management, functional, and acquisition services that have sustained the successful deployment of one of the world's largest enterprise financial systems.

- Establishing a PMO for project planning, business process reengineering, change management, technical and functional analysis that has achieved better coordination and results in cross-agency initiatives.
- Providing PMO support services to manage program cost, schedule, and performance since the inception of multi-year SAP ERP implementation through a through a reliable, resourced IPP.

WHY ERPi?

Our experienced PM advisory services professionals offer a unique set of capabilities to support our clients' organizations by:

- Working intently to understand your unique needs, goals, and objectives so that we can tailor our services most effectively.
- Designing our approach to help ensure management and mitigation of your program and project risks in a non-threatening, transparent, collaborative environment.
